EXPERIENCE

Web Developer Pear Design   Feb. 2017 - Present

Designed web and mobile applications focusing on component systems using tools for prototyping, client feedback, and developer hand-off.

Developed websites and web applications independently and within agile teams with a front-end focus in Javascript ES6, React, and Django.

Oversaw agency contracts, working with clients and developer teams to manage Scope of Work, Specifications and subcontractor agreements.

Digital Strategy Campaign Consultant (Contract)   Jan. 2017 - May 2018

Provided digital strategy, communications, and web development services to successful political campaigns and fundraising initiatives.

Managed campaign websites and digital communications, including brand design, ad copy, targeted marketing lists, and PPC-campaigns.

RECENT PROJECTS

Impakt   Aug. 2018 - Present

Designed browser extension to display ethics data on companies and products through inline alerts on Amazon product and search pages.

Worked with product owners, research partners, and developer teams to update designs to meet evolving product requirements and capabilities.

Designed and assisted in developing product marketing and community blog website with Django REST, Wagtail CMS and BEM SASS.

Happy Active Family   Nov. 2018 - Feb. 2019

Designed mobile application for active-lifestyle parents to plan and share family-friendly activities, integrated with content and product marketing.

Worked with client and developers to wireframe and prototype features to meet brand strategy, business goals, and address core user needs.

Assemblyman Robert Karabinchak   Oct. 2018 - Jan. 2019

Designed and developed NJ State Assemblyman's constituent services website in React using GatsbyJS, CSS Modules, and GraphQL.

Integrated GraphQL APIs with content management webhooks enabling continuous deployment linked to existing communications platforms.

Mari for Michigan   Aug. 2017 - May 2018

Created visual identity for successful first-time political candidate, designing unified brand assets across digital, print and signage.

Designed and developed campaign website with static-content generation, integrated headless CMS, and continuous deployment.
